

Problem Statement

1. User who need a self reliant personal assistant to remind their medications and their information as they wanted to be independent.
2. The elders have tendency to forget taking pills,they have to take pills without depending on others.
3. Some people find it difficult to learn new apps in this ever-expanding digital environment, and people nowadays tend to forget things more easily, such as taking their prescriptions. People need a way to remember to take their prescriptions without having to learn how to use sophisticated programs.
4. People get affected by disease should be reminded to take medicines personally as they forget to take it and aggravate their disease.
5. Patients who are always independent need support to take care of the medication.
